

President Ray Robertson's goals as presented at the 2006 Installation Dinner

Past-President Millsaps started conversations with South Suburban Mayors and Managers to get them involved with finding solutions to better address quality of life issues in our communities. I will continue with those efforts to establish meetings with the judges and state's attorneys to address our concerns and to keep open those lines of communications that Chief Millsaps established.

Our association is still lacking the involvement of our minority police chiefs. I will continue in the efforts of our last two presidents to get these chiefs involved.

The association is currently made up of many agency representatives who do not take an active part in our committees. Several Chiefs serve as chairman of multiple committees. Just as we plan for the future of each of our departments, we need to plan for the future of this Association. We need to get our members involved in committees and let new members know the opportunities that are available to them. I plan to develop a guide for new members outlining our committees and the need for all to be actively involved.
